

# CLOUD STORAGE APP USER STORIES

## As a User...

HIGH

I want to organize my files so that I can easily locate what I'm looking for

I want my cloud storage solution to be easy to use so that I can quickly and efficiently complete tasks.

I want my cloud storage solution to be equally accessible on mobile and desktop so I always have access to my files

I want to edit files in real time with other app users to facilitate collaboration and so that edits are not made on an old file

I want to share groups of files as well as individual files to increase efficiency

I want to save content found on the web to be able to easily locate it later

I want to create content in my cloud storage solution to prevent having to work in multiple apps

MEDIUM

I want to have ample storage so that I can upload as many files as I need without having to delete other files

I want to upload different kinds of files, including pictures, videos, and voice recordings so that I can have all of my content in one app

I want my cloud storage solution to have a robust search function in order to easily find what I'm looking for

I want the onboarding process to be quick and easy, and the option to sign up via social media or gmail

LOW

I want to scan hard copies into my cloud storage app using my phone so I don't have to copy these into the app manually

I want my cloud storage solution to be free
